EDUCATION

Imperial College London | Oct 2023 - June 2026

BSc Engineering & Business

• Relevant modules: Algorithms & Data Structures, Systems Design & Architecture, Machine Learning, Databases

WORK EXPERIENCE

EVO Flight Services & EVO Fuels

Lead MLOps & AI Engineer | September 2026 – Present

- Leading a GPU-hour European supercomputing award to swap cloud AI for local LLMs, projected to save $12,000/yr
- Cut 1,000+ hours of manual labour a year in the sales team by implementing agentic sales callers
- Retained SOC 2 cybersecurity compliance post the implementation of 4 major AI and machine learning projects

Really Good Culture

Full-stack AI Engineer | June 2026 – September 2026

- Built and shipped an AI chatbot to the company website, serving 2,000+ monthly visitors and sold to 7 partners
- Represented the tech team in client negotiations that closed a pilot study covering 10,000+ proprietary data sources
- Hired 2 of 4 shortlisted interns and led a QA architecture expansion, adding 4 new pipelines covering 30,000+ data points

Junior Data Engineer & Analyst | Feb 2026 – May 2026

- Led end-to-end development of an internal retail application, generating client-ready reports for a £500K project
- Shipped 3 internal applications used in reporting infrastructure to production with the data and software teams
- Reduced analysis and report generation time by 20% by automating data collection and reporting across core workflows
- Introduced source-traceability and documentation standards that reduced QA cycles by 30%+

Fenchurch Solutions

Founding Full-stack Engineer | June 2026 – Present

- Delivered projects worth £25–35K for Canadian clients in the book publishing industry
- Solo-deployed the alpha build of a client application and secured £10K in funding for the beta after a client showcase

Technology Stack

Languages: Python, TypeScript, JavaScript, SQL

Frameworks & Libraries: Django, PyTorch, Scikit-learn, Pandas, NumPy, FastAPI, React, Node.js, Express, Angular

Data & ML Tools: Apache Spark, MLflow, Evidently AI, LangChain, Kafka, Hugging Face, LangGraph

APIs & Data Interfaces: REST APIs, GraphQL, SQLAlchemy

Cloud & Infrastructure: AWS (S3, Lambda), Terraform, Docker, Kubernetes, Supabase, Vercel

Developer Tools & AI Assistants: Claude Code, Codex, GitHub Copilot, Cursor, Claude Design
